

Project Reference Sheet

Oak North & Malimbe, Bolongo Block Offshore Geotechnical Site Investigation

Client: Glencore Exploration Cameroon Limited

End Client: N/A

Location: Bolongo Block, Cameroon

Project: Jack-up installation survey

Vessel: MV Zoal Albrecht

Drill Rig / Equipment: GMRJ50 rotary flush marine drill and wireline WISON *in situ* PCPT rig

Water Depth: 5 - 9 metres

Stratigraphy: Clay & sand

Contract Value: 0.55m USD

Fieldwork Start: 14th December 2013

Fieldwork Finish: 18th December 2013

Project Reference

Project Reference	
Project Description	<p>Geoquip Marine were contracted by Glencore Exploration Cameroon Limited for the provision of a nearshore geotechnical site investigations at two (Oak North and Malimbe) locations in the Bolongo Field, Cameroon.</p> <p>The investigation provided identification of the underlying soils at the locations to determine the geotechnical properties to enable engineering analysis in connection with the emplacement of a jack-up rig.</p>
Scope of Services	4 number alternating sampling/PCPT rotary boreholes to 65m.
Project Team	Vessel master and crew, offshore project manager, geotechnical crew, positioning surveyor, drillers and tool operators.
