

Quality Policy Statement

Geoquip Marine is committed to long term business success delivering site investigation, surveying and engineering consultancy through the provision of quality services.

Geoquip Marine will achieve this by:

- Incorporating quality management principles into the Geoquip Marine Integrated Management System (IMS) that comply with the International Organisation for Standardisation (ISO) quality standards.
- Continually improving the quality of services, operations and management systems.
- Defining the quality objectives, responsibilities, authorities and procedures for assuring customer needs, statutory and regulatory requirements are understood and fulfilled.
- Ensuring that each Geoquip Marine employee is competent and aware of the commitments, is accountable for planning, performing and verifying the quality of their work in accordance with the IMS and customer requirements.
- Identifying, controlling and preventing non-conformances within the business process through implementation of the Plan-Do-Check-Act cycle.
- Identifying Opportunities for improvement and managing areas of risk to the company
- Analysing feedback from customer and stakeholder satisfaction and implementing actions to meet and exceed their expectations

The effectiveness of the Integrated Management System shall be measured, analysed and reviewed annually through Internal Audits, Supplier Audits, 3rd Party Audits, annual document reviews and management reviews to ensure customer and interested party satisfaction, compliance with statutory and regulatory requirements, to enhance continual improvement and to make sure that the company's objectives are achieved.

This policy will be reviewed and updated if necessary on a regular basis. Any changes will be communicated to employees at the earliest opportunity.
