

Vacancy – Laboratory Technician (Onshore)

We are Pioneers and Innovators!

This is an exciting opportunity to join our dynamic and expanding team in Bristol. The Geoquip Marine Group specialises in geotechnical site investigations for marine engineering and scientific research projects.

With over 30 years of experience in offshore data acquisition we strive to be the leader in safely delivering reliable geotechnical data for our customers.

We are committed to providing our employees a stable work environment with equal opportunities for learning as well as personal growth and **we encourage creativity and innovation**. Great importance is also placed on maintaining the health, safety and welfare of employees.

Above all, employees are provided the same concern, respect, and caring attitude within the organization as the company owes its success to each individual employee.

Job Summary

The Onshore Laboratory Technician is responsible for undertaking soil testing as instructed based on the approved lab schedules and under the guidance of the Laboratory Manager.

Functions and duties

- Participate in any health and safety talks, meetings or training
- Log in/out all samples in line with procedures and ensure their safe storage
- Prepare, test and analyse samples to determine their content and characteristics, using laboratory tools or testing equipment – testing may include but not be limited to moisture contents, Atterberg testing, PSD tests, strength and consolidation testing
- Compile test reports based on the required international testing standards
- Maintain and update databases of laboratory test results including progress trackers
- Assemble, operate and/or maintain all testing equipment in line with procedures
- Perform inspection and required in-progress quality control of testing equipment
- Assist in the periodic calibration of equipment in line with accreditation requirements
- Ensure timely execution of laboratory tests

Qualifications and Experience

Experience in a similar role is desirable and geological knowledge would be preferred.

We offer a competitive salary and benefits dependant on experience.
