

## Vacancy – Senior Geotechnical Engineer

### We are Pioneers and Innovators!

This is an exciting opportunity to join our dynamic team in the Bristol office. The Geoquip Marine Group specialises in geotechnical site investigations for marine engineering and scientific research projects.

With over 30 years of experience in offshore data acquisition we strive to be the leader in safely delivering reliable geotechnical data for our customers.

We are committed to providing our employees a stable work environment with equal opportunities for learning as well as personal growth and **we encourage creativity and innovation**. Great importance is also placed on maintaining the health, safety and welfare of employees.

Above all, employees are provided the same concern, respect, and caring attitude within the organization as the company owes its success to each individual employee.

The role is an office-based position with occasional offshore site supervision and on-site engineering when required.

### Job Summary

The main objective of the Senior Geotechnical Engineer is to lead and take responsibility of the geotechnical elements of a project lifecycle.

### Functions and duties

The duties assigned to the Senior Geotechnical Engineer are varied, but will include:

- Office supervision and final QA of geotechnical data.
- Technical input to tenders.
- Client interaction on a technical level.
- Review of contractual documents and production of Project Safety and Execution Plans.
- Supervision of ongoing offshore operations from a technical level.
- Assisting the Project Manager in the project lifecycle.
- Approval of onshore laboratory testing schedules and management of onshore testing programme.
- Termination of site unitisation and generation of design soil profiles.
- Performance of offshore geotechnical engineering.
- Writing Factual, Interpretation and Engineering Reports.
- Participate in any health and safety talks, meetings or training.
- Any other duties deemed necessary, which are within the bounds of the incumbent's competence and function.

### Qualifications and Experience

- Recognised qualification(s) in Civil/Geotechnical Engineering or Engineering Geology.
- 4-5 years' experience.

We offer a competitive salary and benefits dependant on experience.

**SAFELY DELIVERING RELIABLE DATA.**
