

Vacancy – Senior Laboratory Technician

A unique and exciting opportunity has come available for a Senior Laboratory Technician in our brand-new Bristol Laboratory. You will have the chance to join a laboratory with great development opportunities in a market leading offshore Geotechnical company.

The Geotechnical laboratory testing to consist of:

- Classification
- Consolidation
- Shear Strength (Total and Effective Stress)

We have successfully delivered a range of exciting and ambitious renewable energy geotechnical scopes in Europe, Far East and USA regions, and are proud to have been selected on a 'return basis' by these companies.

As a Senior Lab Technician, you will be involved in undertaking soil testing based on the client approved lab schedules. You will have the responsibility of supervising and developing junior colleagues. We will also offer support and training to further progress your personal development.

To be considered you will have:

- 2-5 years' experience in a geotechnical soils laboratory.
- Awareness of the full requirements of working within a UKAS accredited soils laboratory environment.
- Proficient in soil testing, be it Classification, Strength or Consolidation.
- Ability to work to deadlines and comply with all H&SE requirements.
- A wide understanding of BS1377 / ISO 17892 soils test methods.
- Familiarity with other, such as ASTM soils tests methods would be an additional advantage.

In return we offer a competitive salary and great development opportunities.

Ready to take on a new challenge in an international offshore company? Apply for the position you are interested in by sending us your resume and cover letter to careers@geoquip-marine.com with the vacancy title as your reference.
